### SCHEDULE

6:30-7pm Design presentation by UBC students

7:00-8pm Community discussion and feedback

Graduate students at the UBC School of Architecture and Landscape Architecture are working with Bamfield residents to design an active transportation route between Bamfield and Brady's Beach. The design includes two kayak launch sites along the Bamfield Inlet and an elevated walkway through the Westminster Bog constructed from materials harvested Bamfield Huu-ay-aht Community Forest.

Come see their design and share your thoughts about it!
